(54) Image processing

(57) A method of processing customer image orders, each of at least one image capturing an original scene. An image content identification in the form of an image content identification signal, is generated based on an identification of one or more scene objects, for at least one image of a customer order. The generated image content identification is compared with different image content identifications stored in a memory in association with respective predetermined customer certificate data. When at least a generated image content identification matches a stored image content identification, generating a customer certificate from the stored certificate data associated with the matching stored image content identification. The method can be used with customer image sets which may not be image orders. An apparatus and computer program product which can execute such a method, are also provided.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 20 1498

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
